Prize Certificate

One of the two K-Theory Prizes of the K-Theory Foundation, Inc. for 2018 is awarded to Ben Antieau, who has contributed to a number of different areas within algebraic K-theory, including algebraic cycles, central simple and Azumaya algebras, derived categories of algebraic varieties, and K-theory of ring spectra.

Prize Certificate

One of the two K-Theory Prizes of the K-Theory Foundation, Inc. for 2018 is awarded to Marc Hoyois for his work in motivic homotopy theory. His research manifests a striking ability to combine abstract theoretical developments with concrete questions in algebraic geometry and homotopy theory - and also non-commutative geometry.
